

SDLC - Assignment-1

Name - Chinmayee Rana
Regd. No. - 20211018149
Section - CSE - 'Z'

SDLC Overview Infographic outline: —

The SDLC is a structured process to develop high-quality software through distinct phases.

Sections to Include: —

- Requirements :—
 - Purpose :— Understand user needs and define what the system must do.
 - Importance :— Foundation of the entire project; poor requirements lead to project failure.
 - Connection :— Feeds into design, must be clear & complete.
- Design :—
 - Purpose :— Create architecture & technical specifications.
 - Importance :— Translates requirements into a blueprint, impacts system efficiency & scalability.
- Implementation :—
 - Purpose :— Actual development of the software.
 - Importance :— Transforms plans into working products.
 - Connection :— Follows design; must adhere to requirements.
- Testing :—
 - Purpose :— Validate that the software meets all requirements.
 - Importance :— Identifies bugs & ensures quality.
- Deployment :—
 - Purpose :— Release software to users.
 - Importance :— Delivers value, needs to be smooth & stable.
 - Connection :— Must reflect tested & approved version.
